movable acoustic walls

Series 500 / 600

Acoustically divide conference / seminar rooms, class rooms, function rooms, office space & community halls

Boasting the most innovative operation in its class, the Series 500 / 600 glides effortlessly into place. The top and bottom seals exert a class beating 2KN pressure to ensure longevity, stability and unrivalled acoustic insulation up to 59dB.

Series 200

Offices, schools, universities, leisure, sport centres

A continuously hinged system, the unique multi-pronged sweep seals and "labyrinth profile technology" combine to ensure that the partition has unbeatable acoustic performance with uncomplicated operation. Available as either a top hung or bottom rolling version with sound reduction up to 48dB.

Series 220

Domestic buildings: flats, apartment blocks, houses

A contemporary solution to the space limitations of a traditional hinged door. Sliding into either a specially formed pocket or beside the opening, this is available with acoustic insulation up to 45dB or as a glazed panel with manifestation if required.

Series 800

Schools, colleges, hospitals, churches, sports halls

For projects where the budgetary consideration cannot compromise quality. A nylon and metal pantograph system combines with top and bottom seals to ensure an acoustic seal of up to 35dB. Faced in hardwearing, easily cleaned fire retardant vinyl to ensure long life.

glazed sliding systems

Series 920

Domestic or Commercial – Mall Shopfronts, Hotels, Offices, Residential

A stylish yet practical space solution. Our 920 glass system can be configured to provide a seamless glass door or a more contemporary look using patch fitting trolley hangers. Adaptable to suit your needs for dual running rails and even curved applications.

Series 930

Domestic or Commercial – Mall Shopfronts, Hotels, Offices, Residential

Bringing the outdoors indoors, this hinged aluminium glass system is secure yet easy to operate and offers ultimate flexibility. Tested to the most stringent European standards for weather, noise, security and air permeability this exceeds expectations for either domestic or commercial applications (also available in timber).

Series 945

Domestic or Commercial – Mall Shopfronts, Hotels, Offices, Residential

Configured in individual frameless glass panels to park to suit the application, this is a movable wall in its truest sense. Innovative use of modern manifestation techniques combine to create a clear yet secure division of space to give ultimate flexibility (also available as a hinged option).

Series 970

Domestic or Commercial – Mall Shopfronts, Hotels, Offices, Residential

Individual panels benefit from a full length top and bottom rail. Dual rollers offer parking options and limited only by your imagination. Available with a clear vertical edge trim to provide a sealed system without reverting to a fully framed product.
